ASAR-UN-NEFER

AUN #1

1

Anno LXXXII e.n.

Greetings and Light Sister/Brothers of darkness entering Light,

DO WHAT THOU WILT SHALL BE THE WHOLE OF THE LAW

We at ASAR UN NEFER are a loosely knit group of magickians (artists, musicians, poets, philosophers) presently based in Minneapolis, MN. For the past several years we have been dwelling in silence, but now arise to cast our bread upon the waters, that our message might carry out on the waves to those who stand waiting on far shores.

We are the beginning of a nucleus of the Body of God. To that end we take an eclectic approach uniting the eastern and western systems of mysticism and magick. We are agnostic thelemites united with Mead in cosmic dances of tantric mystery and rapture.

Our work is along Erisian and Double Current 93/696 lines, the ongoing awakening of expanded consciousness states. We open our eyes and are appalled to see a world that has gone mad, the age of man-machine, these angular humans jerked along by ever tightening strings. Tension, overwork and overworry lead to breakdown or explosion. Our society is run by machines fueled by greed, lust power and death. We disdain this cool slick race to pain, and seek harmony with what surrounding is open to change. The ongoing evolution of humankind and the awakening of the race gestalt in which all eyes are opened; an age in which the power of Truth will liberate some from form. We actively seek balance with all the force of will to turn the tide of left-hemispheric imperialism, away from race destruction.

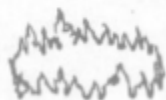

Our flowers bloom in the pearly luminescence of night, their faces shining with starlight. We seek the balance to create an eye in the hurricane, that Homo Veritas may manifest among us, that the future might be brighter and more sane.

We call to the powers that might bind the darkness and the light with unbinding, that growing freely they too might bloom with flowers that will open minds with their scent.

Likewise our call goes out to other other gardeners who care for their flowers that they might forever bloom freely giving all their beauty to the world.

To this end that the network of light be strengthened, we open our windows to your worlds that the varied influx of energies may with time nourish all in our flight.

LOVE IS THE LAW, LOVE UNDER WILL
