

Raise high the flag of the future

LET ALL BE ONE IN UNITY

Living balanced on the flow of life

Listen to the harmony of light.

Running in a bacchic frenzy

Cutting feet on sharp stones of night

Dionysus Fire Light

Brightest nothing burning space

come and save the human race.

Hear a prophet, the visions mine

seen and heard and written blind

I see perfection in the inner eye

shout it to the stars and let them fly

Come everybody awake to PAN

See the shining victory, throw away regret

Throw away the selfish self

Come and beget the man everyman in his perfect state

Satyr running bear over rocky mountains peak

Thrill to the lissome light and come under the stars

Men throw down your virgin life of anger

Come as one then cry to fill the cup of despair

at what life has already become

Throw restriction to the dead past

In unbound glory shine bright

Be everybody instead of self

Kill no more in the name of health

Bring great earth to yet another birth
No longer against her upon her as a vulture prey
Ripping with her life your own away
Let the vulture be one with the soaring hawk
flying in a line with the heart of the sun
Flame toward new beauty
Let the victory be woman

Since when is tragic bad?
It just realizes the whole nature
god ego and beast one
One as god and man and earth
dust to dust and ashes ashes
LET killing fall in death and change to loving pleasure
scream and cry the pangs of loving hunger
then throw away suffering and eat your eternal other

Open your sleepy eyes and see your sorrow plight
Fill your stupid dark with intellect light
Let every moment be a loving fuck
Woe to man when woman comes
everyone flowing and crying with love
Do you want to be like an ant, as only a drone?
If not life demands you tear down the blood bespattered war throne

I say this, and you think I mean that
Between us there's nothing, that's where it's at

Shut up words who just blow air
Fill all thought with love and care
No more sweet parables for sin's increase
Be one! be one with god and beast
If not the headless horseman rides on
Find your godhead and put it back on

Come poor and broken mind
You're worse than just an animal
You live as a parasite
Wreaking death for all life
Grasp firm the law of love and life
Extend the light into your head
Extend the light inside your bed
Make the earth as bright as sun

Jump from the frying pan into the fire
See the moth circle flame and diving die in pleasure

Man's treasure is trash, let's make his trash treasure
Throw away the bright gold, and find the true leisure
Help us find the peaceful pleasure
Become as a world Homo Veritas
Emphasize life!
Come sex death, the androgyny of humanity
The death of the lonely world
The end of the "good" life

We seek food, you give us poison

We seek pleasure, you give us pain

We seek love , you give us sex

We seek sex, you put on the rubber glove

Where is life? He lives alone drowned in a plastic throne

Little brain sitting in a plastic shoe

Have you no body supporting you?

Moral majority your life's a fraud

you're a syphalitic canker on the ass of god

Heal your death of life

Fill the hole in the wall of destruction

Pleasure and pain becoming pleasure

Killing the world that will not die

changing life so man can fly

Unbound from work unbound from race

Man can spread to brighten space

Pain contracts, Beauty expands

Be one with beauty expand to joy in the land

Right hand holding mind and left hand sex

Make both hands one and come forever

An urge for destruction an urge for creation

Kill yourselves and make a new world for the children

We ask for death and science makes us live another day

We cry to the mountains to fall on us but they do not hear

Man's soul cannot talk to them

For we are man the oppressor, man the repressed
Be not one but everman see who you really are
How many paranoids what do they see?
They see the face of man monstrosity
Homo Veritas come to the new age

Outlaw it government, cry more bloody sin
Try telling me pleasure's pain when I plug in
Come to the new age, See the energy
All is energy in atoms and star system
What's in between space? You and me
You wonder how the birds and fish are guided in their way?
They are electrons of the Earth, spinning in their joy
See the lemmings at land's end jump into the sea
Then look at us and see the bomb, do you want to see?
They are little children whirling in their mother

But man sits still, he is not free
His limbs are bound with chains as long as money
Man can no more create his hands are filled with labor
He cut off his penis with efficiency's pleasure
Don't watch your life on the silver screen of illusion
you are the screen, you are the dream
Technophilosophy, not technotheology, technology not technocracy
We won't get to space in any elevator
Build us a little brother, man and machine
Let the child fill your perfection, be god again

Heart girt with a star snake am I

Be like one in beauty and fly
put down the painful life, pick up the pleasure
put down the working life, pick up the leisure
Find peace and joy in the hand of god and nature
Don't look in the skys: or under the ground
It is within that the indwelling spirit is found

The sick man feels the disease of the world
he is but a 'reflection
he cannot change himself
so must change all to new direction
We all praise death, but I want life
It's not the world I change but myself mankind
The world stays living on though in lesser glory
the more we tear away
The world she stays the same
for she reflects the stars
We black darkness on her surface are her scars
We're nature's scars for we have torn ourselves away
Come be one with her again
and she'll be ours to stay
To be with her in peaceful bliss
Or to new stars away.
