

b) The concept of a HGA is a very complex idea. While <sup>pg. 1</sup> Adria is uniquely 'my' HGA, there is at the same time only one HGA for everyone on the planet — ie Adria is also Anne's HGA & Maggie's HGA, etc. To say that ~~Adria's~~ my HGA is the same as Anne's HGA is absolutely wrong, yet to say that my HGA is different ~~from~~ than or separate from Anne's HGA is also wrong.

c) At this point in time, it is very important to form linkages Day/Night-side. In the past only adepts could form such linkages because of the preparation needed & the safeguards built into the system to protect the novice. First the adept had to master personal kundalini & be able to raise his/her own kundalini force to his/her own throat charkrah before the tunnel could be opened. At this point in time there is a great need for the race to form a permanant link with Nightside in order to solve the problems which threaten to destroy us. Personal safety is no longer the priority it once was. It is now possible for non-adepts to make cross personal linkages Yesod/Da'ath via oral sex (perhaps, more especially, cunnilingus, but that was unclear). The kundalini does not need to rise through the body & 'burn-out' the impurities before practical workings can begin; the kundalini simply leaps down & out of Yesod to Da'ath of the throat which is only inches away (the sexual

fluids of the priestess forming a conductive pathway to guide the leap in the cases where the priestess is unable to focus the energy properly).

d) The nature of these Yesod/Da'ath kundalini linkages is as follows. The sexual force is focused by the higher self (with or without the knowledge or consent of the ego-self) to Da'ath of the partner (I was told that there is a greater success between lesbain couples due to the ease with which the priestess can identify with the partner & the essential identity of the duality). The force penetrates the abyss, opening up the channel (to Nightside) which is usually closed. Large amounts of energy flow Day-Nightside to clear blackages in the channel. If the linkage were to be broken at this point, the priestess would be sexually depleted & frustrated due to having ~~no orgasm~~ neither orgasm nor energy to continue. Ideally, the direction of flow reverses precisely at the point of exhaustion of the priestess & (aprox.) the same quantity of energy comes back Night-Day. The purpose of this energy exchange is not Day/Night fertilization, but more of a fart or a gargle to clear the tubes & excercise the 'muscles' to allow the channel to stay open for longer & longer periods. It also sets up some sort of 'carrier-wave' which may be used at some future time for energy or information transfer.
